1. INTRODUCTION

WHAT IS OPTILIFTS?

A Smart Personal Trainer

Imagine going to the gym with an expert personal trainer standing right beside you. They keep track of every weight you lift, every kilometre you run, tell you exactly when you're ready to lift heavier, and adjust your plan on the spot if you're having an off day or feeling tired.

That is **OptiLifts** in a nutshell.

WHY USE OPTILIFTS?

Most traditional gym apps are just digital notebooks where you write down numbers and sets, but **you** still have to figure out all the math, planning and estimated.

OptiLifts solves this by doing the thinking for you:

1. **Guides your weight increase:** Instead of guessing when to lift heavier, OptiLifts will analyse your history and tell you when it's time to add a small amount of weight or do an extra rep.
2. **Assists in real time:** If a set feels unusually heavy or tiring, you can mark it as an effort rating of 10. OptiLifts will make use of a fatigue tracker to lighten your load, suggesting alternative exercises.

WHO IS OPTILIFTS FOR?

Regular Lifters who want a personal tracker that does the science behind progressive overload for them.

2. GETTING STARTED

Creating an Account

To begin using OptiLifts, navigate to the web application home page at app.optilifts.app.

1. Click **Register** on the login screen

REGISTER

LOGIN

2. Enter your **Email** , Username and a secure **Password**

REGISTER

Google Sign-in

You are able to sign in with your Google account by clicking on the 'Sign in with Google' button and connecting to your account.

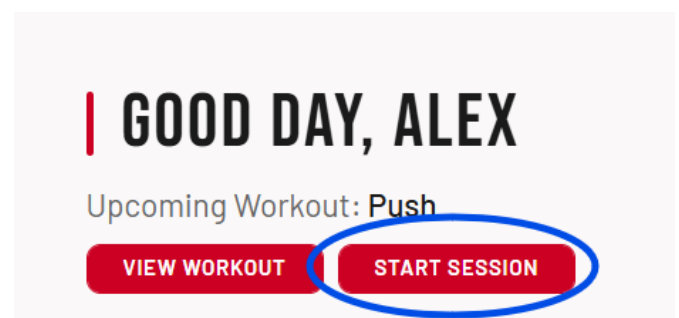

3. NAVIGATING YOUR DASHBOARD

Your Dashboard is the central hub for all of your training activities.

Key sections

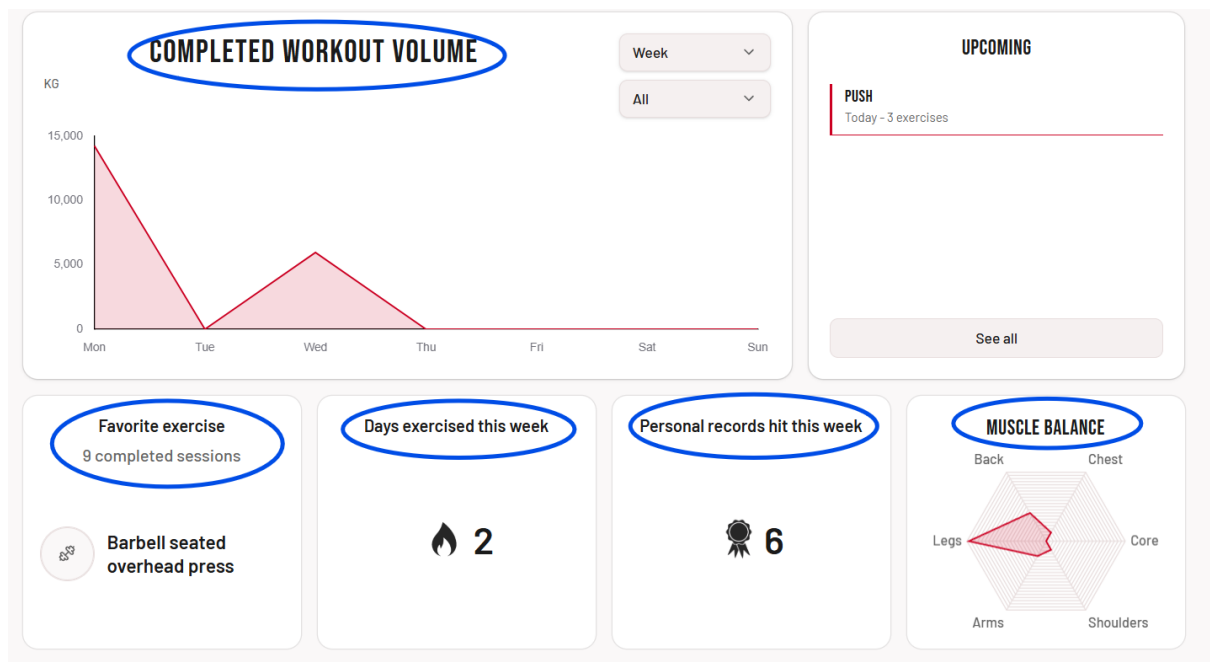

- **Quick Start Bar:** Start your scheduled workout immediately
- **Upcoming Workouts:** Displays workouts planned.

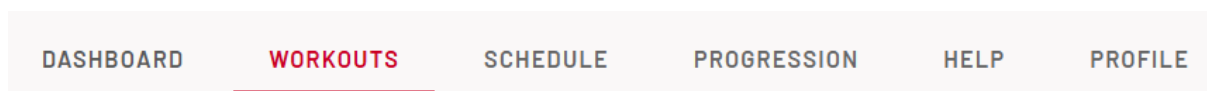

UPCOMING

- **PUSH**
Today - 3 exercises
- **Weekly Volume Summary:** Gives you a snapshot of total sets and weight lifted this week.

ds, favourite exercises, record, etc.

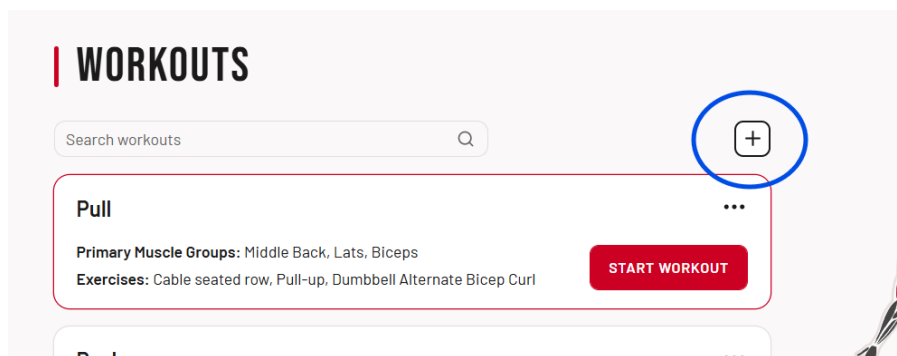

4. BUILDING AND MANAGING WORKOUTS

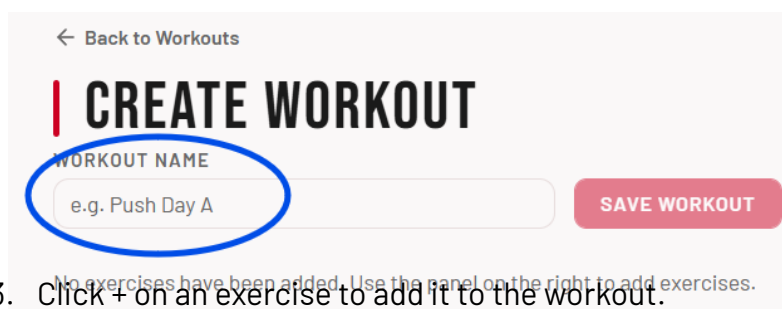

Creating a New Workout

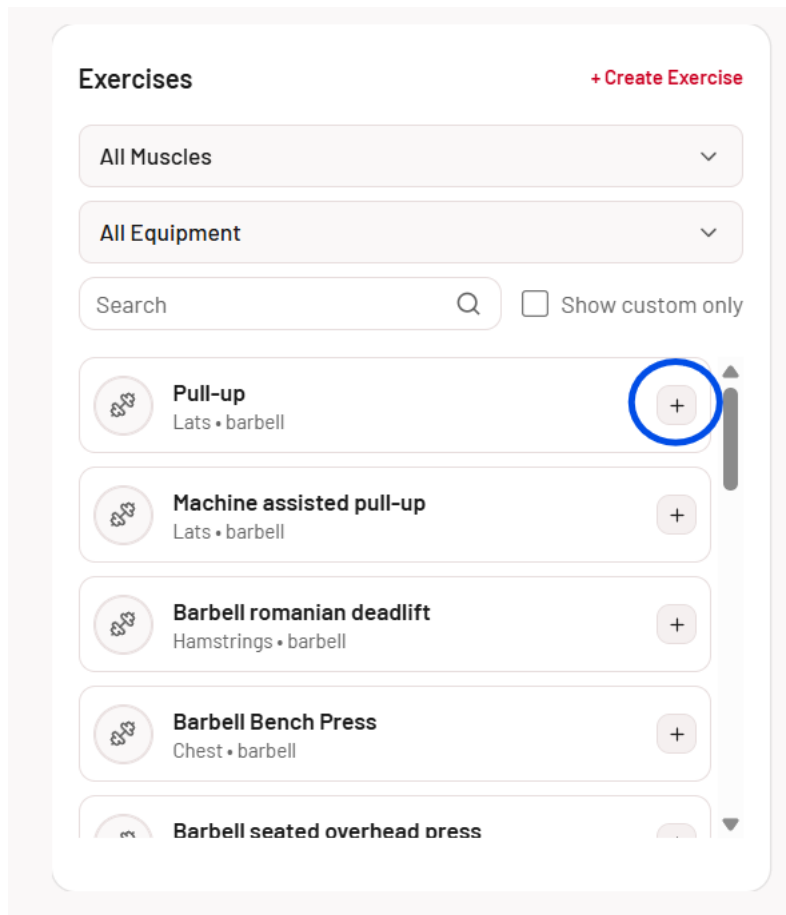

1. From the navigation menu, select Workouts and click +.

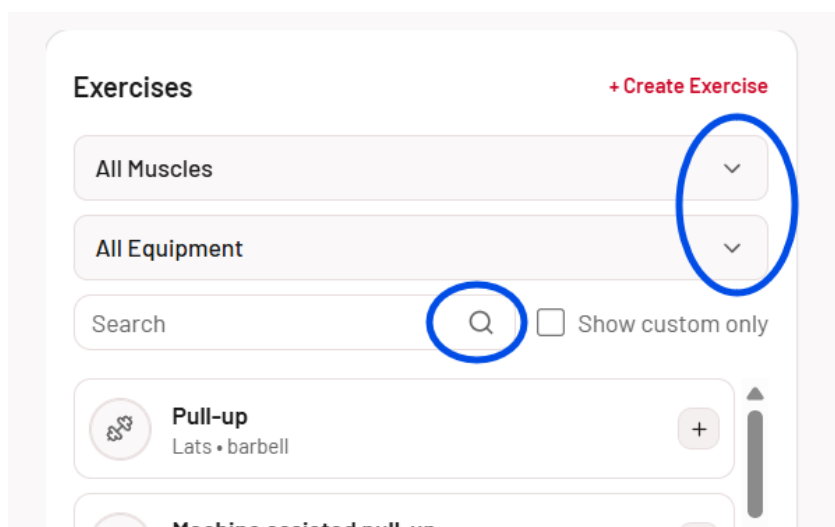

2. Give your workout a clear name (e.g., Upper Body)

3. Click + on an exercise to add it to the workout.

4. Click on the search bar or filters to find a specific exercise

5. Define your base Sets, Reps, and initial Weight or Duration, etc., for each movement

Dumbbell one arm seated hammer curl
Biceps

5. SCHEDULING YOUR WORKOUTS

DASHBOARD WORKOUTS **SCHEDULE** PROGRESSION HELP PROFILE

OptiLifts features an intelligent calendar that keeps your training structured while remaining flexible.

Planning your week

1. Go to the **Schedule** tab from the navigation menu
2. Click on the day to open the workouts popup

3. Select the workout you wish to schedule and configure repeating.

SELECT WORKOUT

Search workouts or muscle groups 

Pull 

Primary Muscle Groups: Lats, Upper Back, Biceps
Exercises: Cable lat pulldown full range of motion, Cable seated row, Pull-up

WORKOUT TIME *
09:00 

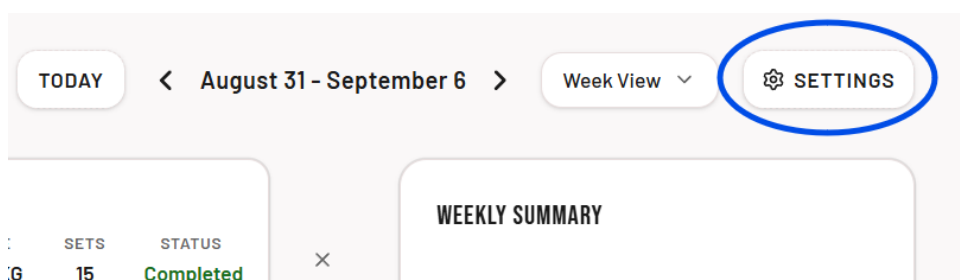

☐ Repeat

CANCEL **SCHEDULE WORKOUT**

Google Calendar Sync

You are able to have your schedule sync with Google Calendar.

1. Click on the **Settings** button to open up the Schedule Settings popup.

2. Click on **Sign in with Google to sync calendar**

 **SCHEDULE SETTINGS** ×

GOOGLE CALENDAR INTEGRATION

Sync your scheduled workouts to a OptiLifts calendar in Google calendar.
Syncing applies to your future workouts only.

 **SIGN IN WITH GOOGLE TO SYNC CALENDAR**

DYNAMIC RESCHEDULING ☐

Automatically re-schedules missed workouts within active cycles

SAVE RESCHEDULING PREFERENCES

3. Follow the popups instructions to connect your desired Google Calendar to your OptiLifts.

Any workouts you create will now be automatically synced to your Google Calendar as a dedicated OptiLifts Calendar event.

 **Google Calendar Connected** Disconnect

Sync Schedule to Google Calendar ☒

6. DYNAMIC SCHEDULING

OptiLifts has an intelligent dynamic rescheduling feature that will suggest a new schedule when you miss a workout. You are able to choose which of your missed workouts you want to reschedule, as well as approve the proposed new schedule.

To turn dynamic scheduling on, navigate to the **Settings popup**. Toggle the checkbox next to the Dynamic Rescheduling header on.

DYNAMIC RESCHEDULING

Automatically re-schedules missed workouts within active cycles

SAVE RESCHEDULING PREFERENCES

Once you have turned rescheduling on, there are a variety of settings you can configure:

- Max workouts/day → The maximum number of workouts that the reschedule can schedule for a single day
- Min Muscle Rest (Hours) → The minimum number of hours that there must be between a certain muscle being worked out, and the next time it is worked out.
- Fixed rest days → Specific days that you never work out on, and never want anything rescheduled on.
- Cycle length (days) and Cycle start date → your workout cycle period wherein you complete all your desired workouts before restarting, eg. PPL

DYNAMIC RESCHEDULING

Automatically re-schedules missed workouts within active cycles

SAVE RESCHEDULING PREFERENCES

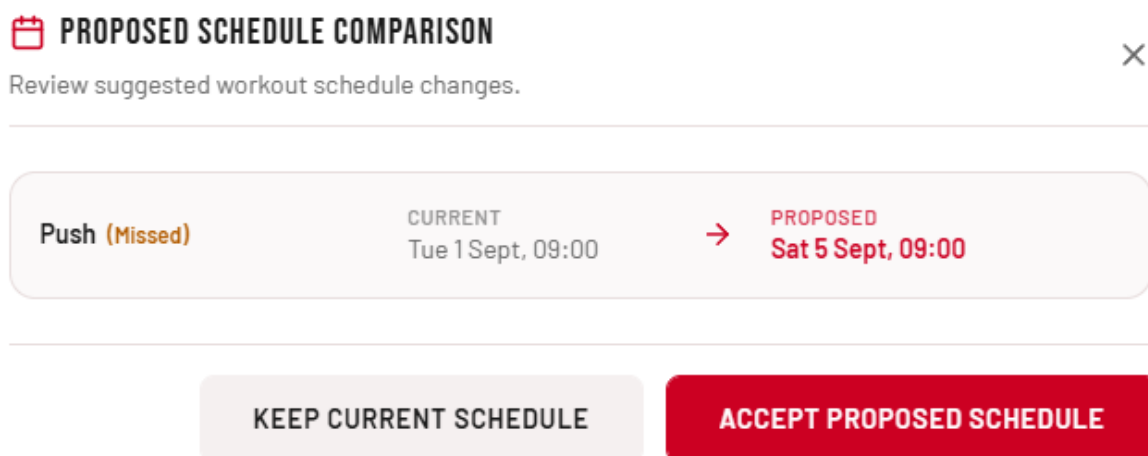

Click on the **Save Rescheduling Preferences** to ensure your personal configurations are saved.

Now, if you miss a workout, a **Missed Workout** card will pop up on the **Schedule** page. You can then select all the workouts you want to reschedule, and then click **Reschedule Cycle**.

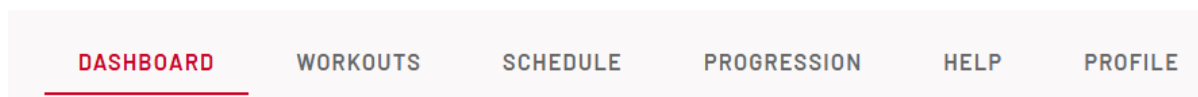

A rescheduling preview modal will popup, which shows you a proposed new schedule.

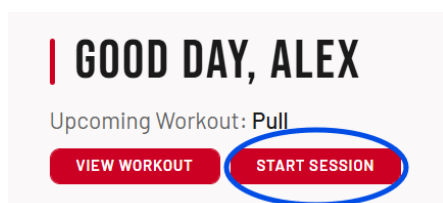

You can choose whether to **Keep Current Schedule** or to **Accept Proposed Schedule**. If you keep your current schedule, nothing will be updated and the missed workouts card will remain on your screen. If you accept the proposed schedule, the relevant workout sessions will be moved onto the new dates and their status updated to 'Schedule'.

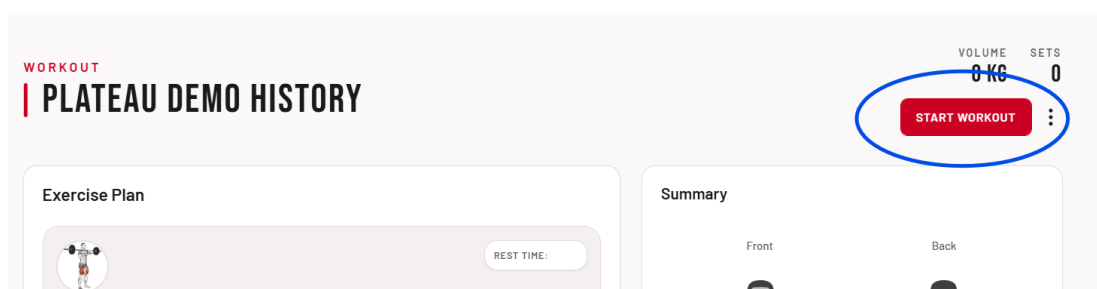

7. TRAINING LIVE (ACTIVE SESSION)

When you step into the gym, tap **Start Workout** on your dashboard to enter **Active Session** mode

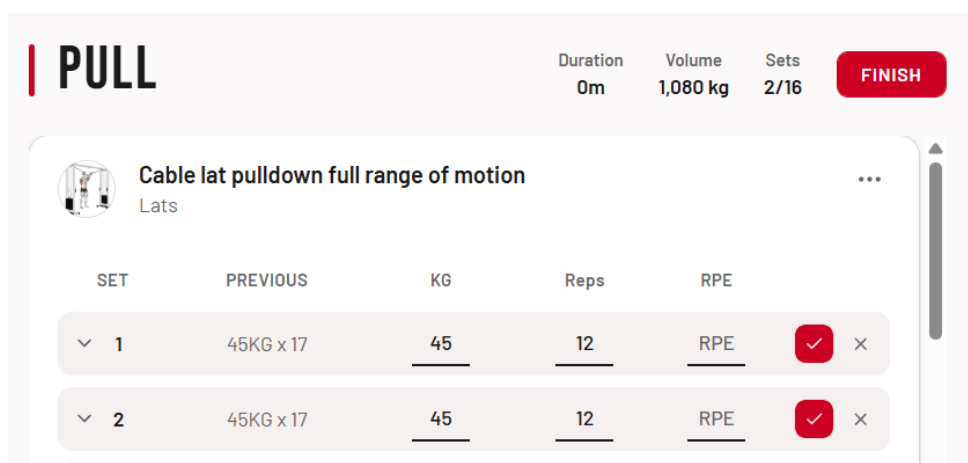

Alternatively, you can navigate to the **Workouts** page, then click on a workout to go to its workout details page, and select **Start Workout** there.

Logging Sets and Reps

1. As you finish a set, adjust the actual **Reps** and **Weight** lifted if they differed from your target.
2. Tap the **Checkmark** icon next to the set row to mark a set as completed.

Completing a Session

Once all your exercises have been logged, tap **Finish** at the top right

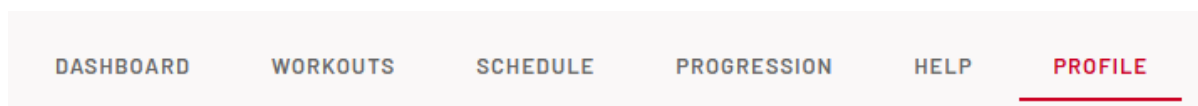

8. COMPLETED WORKOUTS

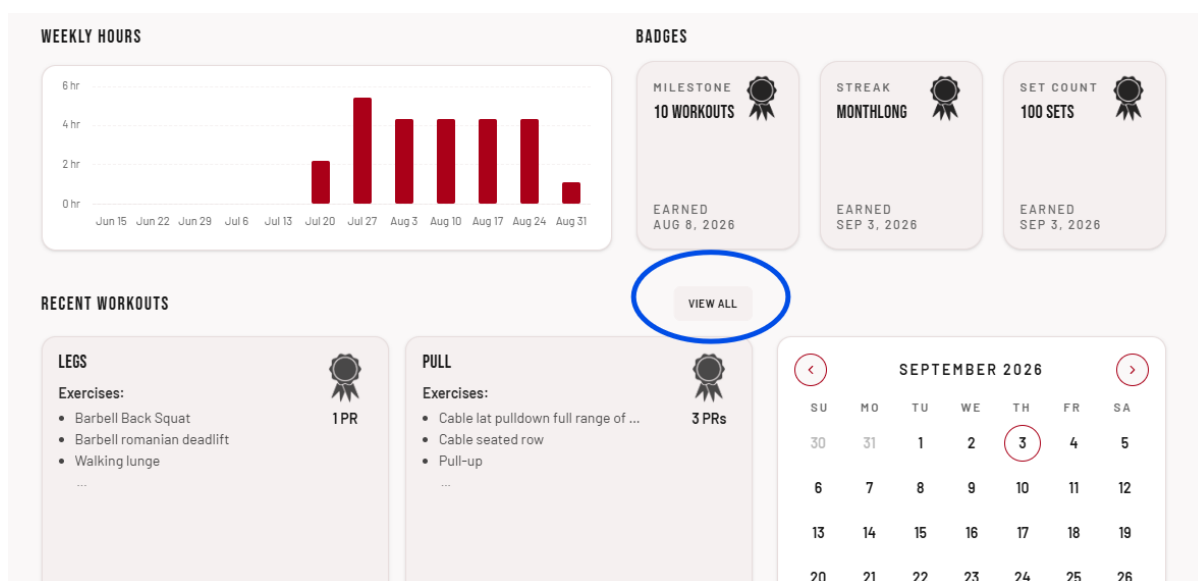

Viewing Completed Workouts

Once you have completed a workout, you are able to view your past workouts.

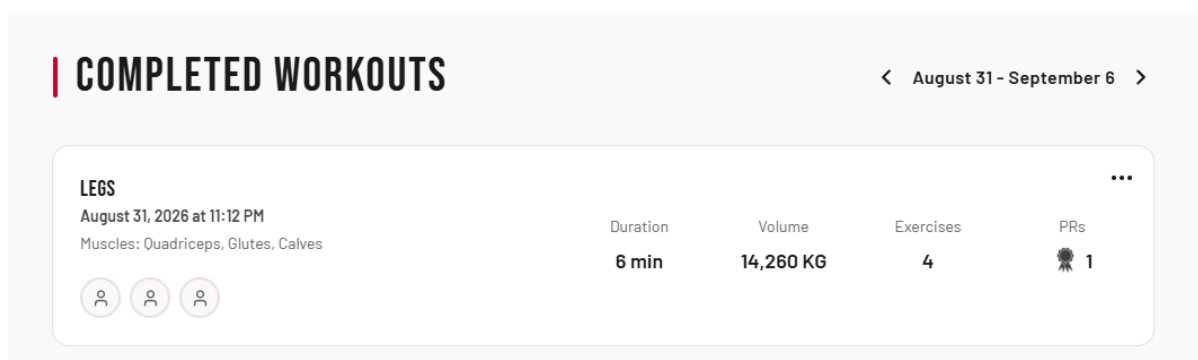

1. Navigate to the **Profile** page

2. Click on **View All** next to your **Recent Workouts**

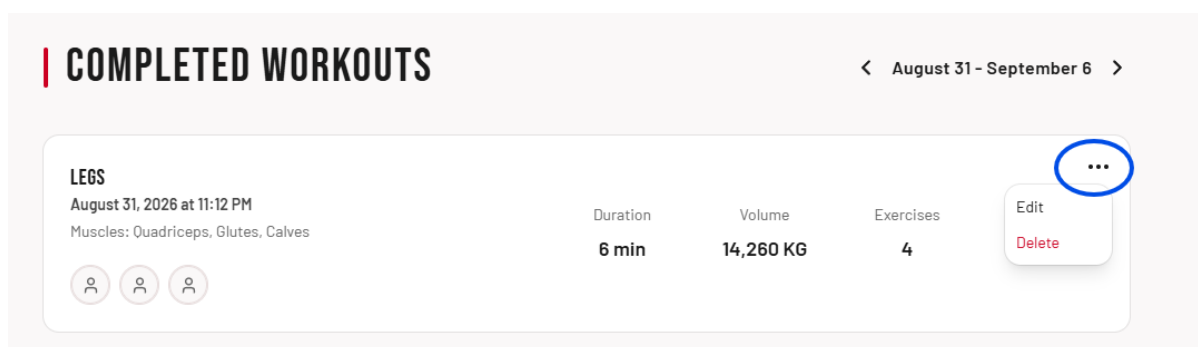

3. This will take you to the **Past Workouts** page, where you can view all your workouts

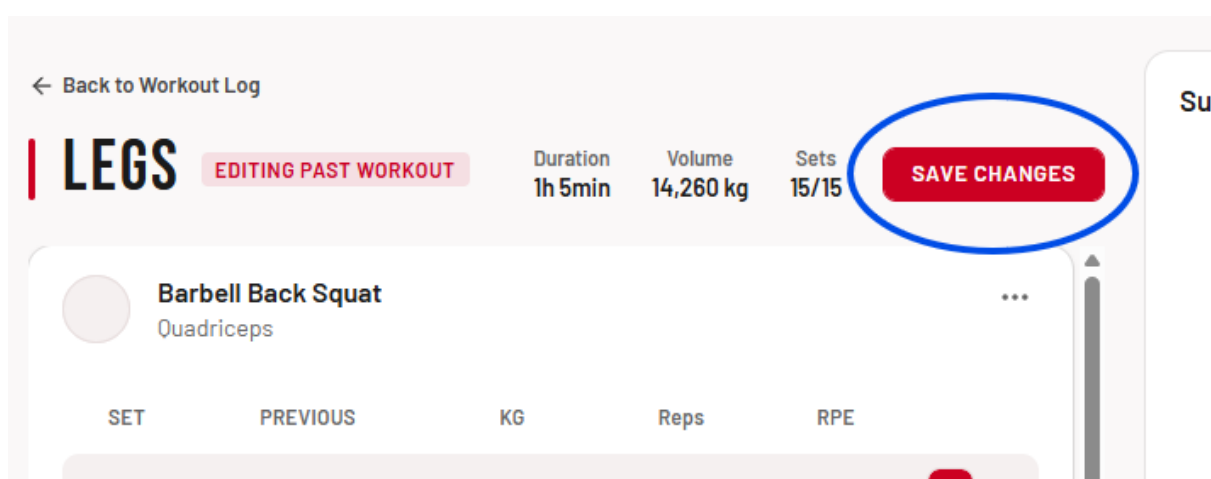

Editing Completed Workouts

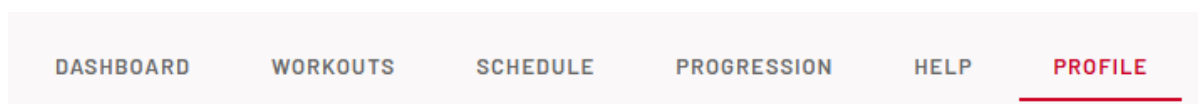

To edit a past workout, click on the three dots next to the past workout, and select **Edit**.

Edit your workout as needed, and then select **Save Workout**.

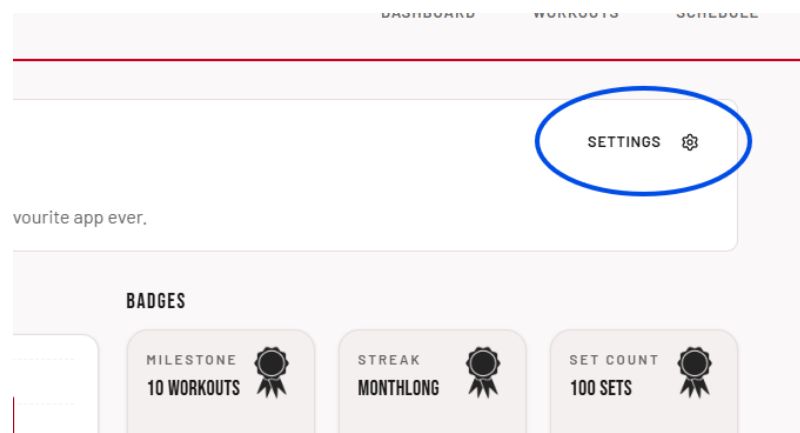

9. PROFILE MANAGEMENT

Go to the **Profile** page to view your historical workouts and progress

Configuring Settings

1. Click on the **Settings** button on the top right of the page.

2. Click on the dropdowns to change your preferred theme and metrics.
